

Make a Pipe Cleaner Flower Ring

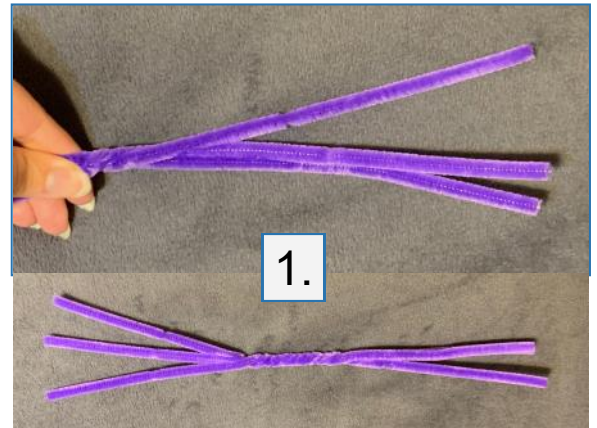

Pipe Cleaner Flower Ring Directions

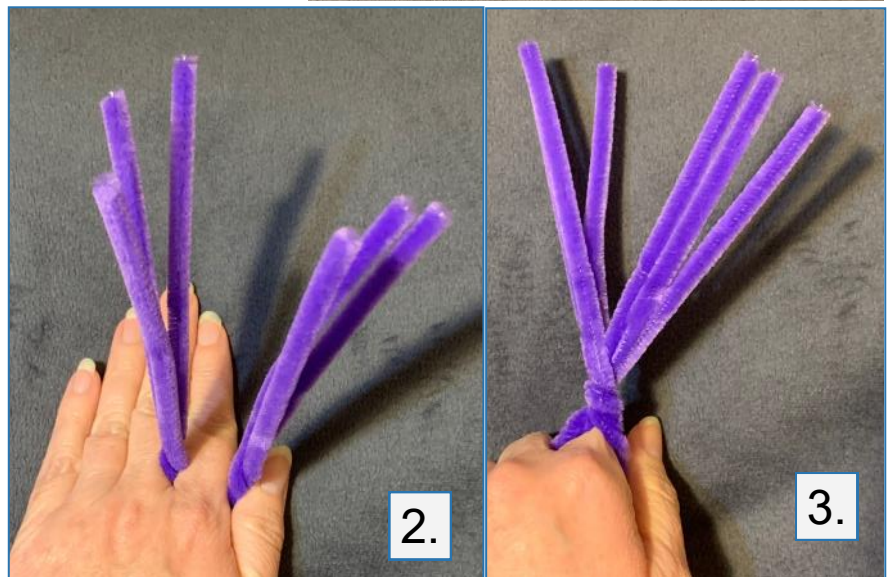

Materials: 3 pipe cleaners in one color & 1 green pipe cleaner.

Directions:

1. Line up the three pipe cleaners of the same color and twist them a few times in the middle—around 4-5 times. This helps to get the ring on and off.

2. Wrap the middle of the pipe cleaners around one of your fingers, making sure the ends are even.

3. Twist the pipe cleaners 2-3 times around your finger, but not too tight so you can remove the ring.

4. Remove the ring from your finger and separate the pipe cleaners evenly as the picture shows.

5. Pinch the end of one pipe cleaner and roll it tightly into a spiral towards the center. Continue with the other 5 pipe cleaner ends.

5.

6. After rolling all the spirals, bend and arrange the “petals” into the shape of a flower.

7. Flip the ring over and wrap the green pipe cleaner around the base of the flower. Twist the two ends together a couple times to keep it in place.

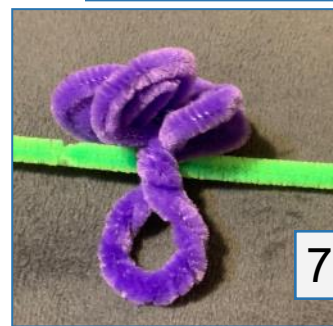

8. Roll each end of the green pipe cleaner into a spiral to make the flowers leaves.

9. Pinch the tip of each green spiral to make them leaf shaped.

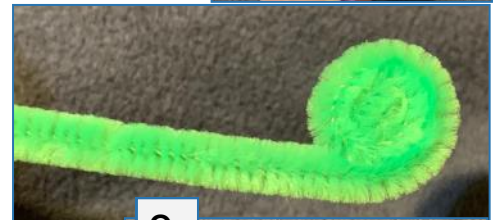

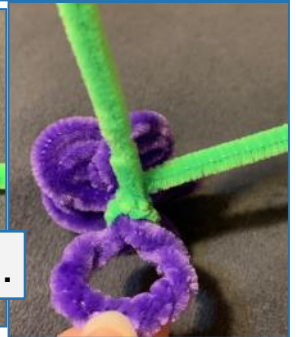

10. Your done—wear your pretty flower ring for the spring!
